
a
Pearson correlation
(clu spec vs dec spec)
nclus
kmeans, cv=True
kmeans, cv=False
rm, cv=True
rm, cv=False
p<0.05
p>0.05
b
Harris hierarchy score
r = -0.12
p = 0.41
49 regions
Specialization (clu)
c
Harris hierarchy score
r = 0.21
p = 0.13
57 regions
Specialization (dec)
d
count
Beryl regions (198)
random groups (198)
EMD = 0.028
mean SE vs shuffle:
p = 0.001
SE of PC1 coefficient score per group
e
count
k-means groups (100)
Beryl regions (198)
random groups (20 draws)
mean s.d.
k-means 818
regions 2393
random 2549
s.d. of PC1 coefficient score per group
